

## Sharing innovative approaches to strengthen resilience through preparedness during health emergencies

📅 19. April, 2022    ⌚ 9:30 - 11:00

📍 Online Workshop

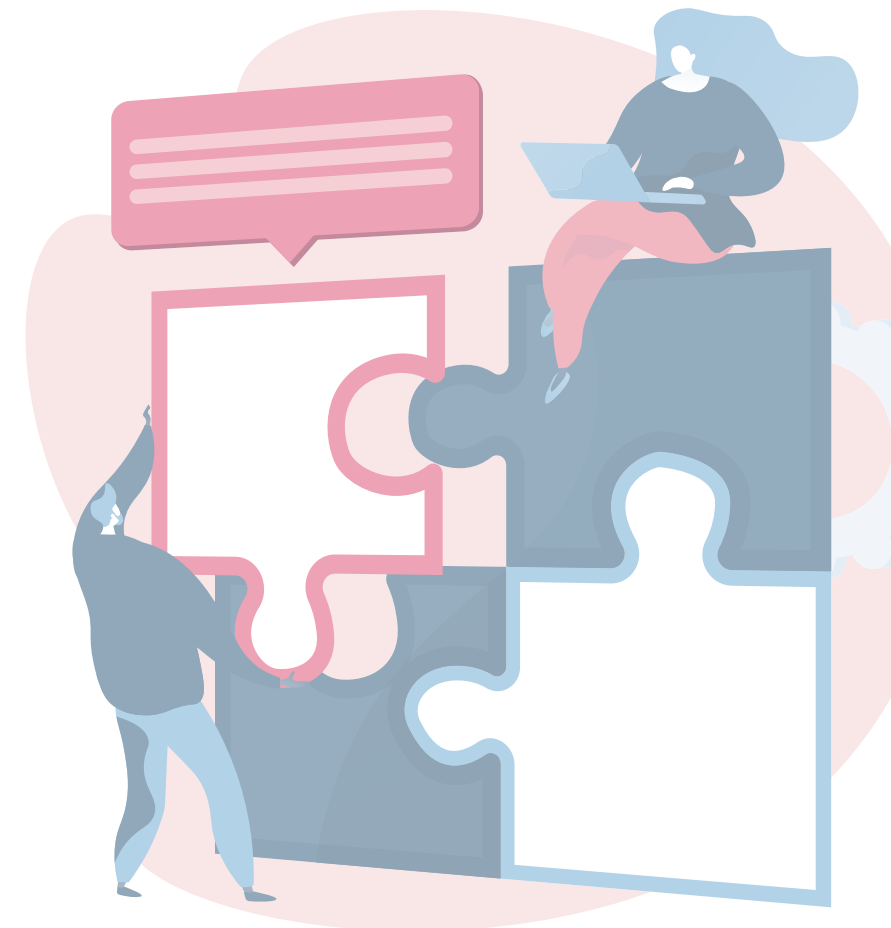

iProcureSecurity PCP

EIP ON AHA RSCN

## Concept

The COVID-19 pandemic waves before the vaccines were made available to the broader population required the set up of an emergency response of unprecedented scale, and unveiled the need for our health care system to strengthen their capacity in terms of resilience. This translates into a joint effort between hospitals and territory to harmonise and integrate their service offer, in a way that can react timely to health threats. The challenges of providing health care in the midst of emergencies have been known for a long time: besides pandemics there are floods, earthquakes, armed conflicts. Global-scale disasters, such as the earthquakes, and long-lasting and protracted conflicts generate huge numbers of casualties and simultaneously damage local infrastructure, including medical facilities. They have consequences not only for the earthquake or war-wounded but also for the health of entire communities (1). A number of experiences are available to support disaster preparedness (2), and the UN highlighted how some policies and frameworks need to be rethought or redesigned, while others need to be better implemented during the course of emergencies (3). Stronger coordination and engagement of local key actors is at the core of an improved approach. Innovative service integration may contribute to the effectiveness of the response in the course of an emergency threatening health in a multi-hazard scenarios.

## Ambitions

The ambitions of the workshop are the following:

- Contribute to the iterative process of identification of the requirements of iProcureSecurity PCP solution by engaging experts and external stakeholders in the project activities.
- Contribute to better understand the challenges and strengths of existing systems, by engaging the regions to share their experiences on real cases, the shortcomings etc.
- Identify challenges for service integration in the case of emergencies
- Increasing awareness of the regions to exploit innovative procurements for scaling up innovative solutions, also identifying and addressing training gaps to facilitate the use of these new funding models

## Actions

The objectives will be achieved by:

- Sharing preliminary results and the core of the foreseen technical solution from iProcureSecurity PCP, focusing on the key elements characterising a digitally supported platform customised for health emergencies
- Engaging reference regions in the discussion to share their experiences
- Involving experts and procurers to share knowledge and overcome bottlenecks hindering the adoption of innovative solutions at scale.

🕒 Time	# Subject	👤 Presenter
9:30 - 9:35	<b>Introduction</b>   Welcome and Introduction	iProcureSecurity PCP Partners
9:35 - 9:45	<b>Project Overview</b>   iProcureSecurity PCP Overview	iProcureSecurity PCP Partners
9:45 - 10:15	<p><b>Challenges in facing Mass Casualty Incidents</b>  <i>Hands-on Perspectives</i>                      Challenges in facing on Mass Casualty Incidents by regions on:</p> <p><b>SPEAKER 1. Gian Matteo Apuzzo – Topic covered: Pandemics &amp; Migration</b>                      Senior Programme Manager at Central European Initiative-CEI (Friuli Venezia Giulia Region).</p> <p><b>SPEAKER 2. Mr. Manfredi Rizzo. Topic covered: Migration</b>                      Mr. Rizzo is member of the Research and Internationalisation Unit of the Palermo University Hospital Paolo Giaccone.</p> <p><b>SPEAKER 3. Mrs. Lucia Di Furia – Topic covered: Earthquake PhD,</b>                      Director of Marche Region Health Service 2016-2021.</p>	<p>PROMIS                      RSCN</p>
10:15 - 10:50	<p><b>Interactive Session</b>                      Sharing of iProcureSecurity PCP requirements &amp; insights gathering gathering from the participants, based on the Real Case Studies.</p>	iProcureSecurity PCP Partners
10:50 - 11:00	<b>Wrap up + Q&amp;A Section</b>	iProcureSecurity PCP Partners
